

Research Center for Advanced Science and Technology, The University of Tokyo, Japan

Naoji Matsuhisa is an Associate Professor at Research Center for Advanced Science and Technology (RCAST) in the University of Tokyo. His research interest is in stretchable electronic materials and devices for the application in next-generation wearable devices, and human-computer interfaces. He received his PhD degree from the Department of Electrical Engineering and Information Systems in the University of Tokyo in 2017, and worked as a postdoctoral researcher at Nanyang Technological University in Singapore, and Stanford University in the U.S. In 2020, he joined the Department of Electronics and Electrical Engineering at Keio University as an Assistant Professor. In 2022, he became an Associate Professor at Institute of Industrial Science (IIS) in the University of Tokyo. He has published more than 50 peer-reviewed papers (>10,000 citations). He is a chair of young researchers' society for flexible and stretchable electronics in Japan. He is the recipient of >10 awards including MIT Technology Review Innovators Under 35 in 2022, and PMI Future 50 in 2023.
